Professional Summary

Software Engineer with 5+ years of experience designing and building scalable, high-performance web applications using React, Next.js, TypeScript, Vue.js, and modern JavaScript frameworks. Experienced delivering enterprise solutions across EdTech, FinTech, recruitment, and digital assessment platforms, supporting thousands of concurrent users. Strong expertise in frontend architecture, accessibility (WCAG), SEO, performance optimization, reusable component systems, and responsive design. Proven ability to collaborate across product, design, backend, and DevOps teams in Agile environments. Recently expanded into backend development with Node.js, Express, PostgreSQL, Prisma, and Python, building full-stack applications and automation solutions.

Career Highlights

- 5+ years building enterprise web applications.
- Frontend Lead for Enterprise Assessment Platform
- Built AI-assisted proctoring features with Amazon Rekognition.
- Improved SEO using Google Search Console, Ahrefs and Lighthouse.
- Built full-stack applications with Next.js, Node.js and PostgreSQL.
- Developed Python automation and AI-powered competitive monitoring.
- 68+ public GitHub repositories.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3

Frontend: React, Next.js (App Router), Vue.js, Nuxt.js, React Hooks

State Management: Redux Toolkit, React Query, Zustand, Vuex, Context API

Backend: Node.js, Express.js, PostgreSQL, Prisma ORM, REST APIs, Authentication

Styling: Tailwind CSS, SCSS, Styled Components, CSS Modules, Responsive Design

Testing: Jest, React Testing Library, Cypress, k6

SEO & Performance: Google Search Console, Ahrefs, Lighthouse, Core Web Vitals, WCAG, Technical SEO, Performance Optimization

Practices: SSR, CI/CD, Component Libraries, Design Systems, Agile, Scrum, Code Reviews

Professional Experience

Software Engineer (Frontend Specialist) | Lorem Excellentiam (9ijakids) | Jan 2023 – Present

- Led a team of 4 Frontend Engineers delivering enterprise web applications using React and Next.js.
- Designed and developed scalable React and Next.js applications for an EdTech platform serving students, parents, teachers, and administrators across multiple products.
- Designed and implemented 100+ reusable React components adopted across multiple enterprise applications, improving consistency and accelerating feature delivery
- Designed and delivered secure role-based dashboards that streamlined administration and improved operational efficiency for internal users.
- Collaborated with backend engineers to integrate REST APIs, authentication, payments, analytics, and reporting services.
- Optimized application performance through component memoization, lazy loading, code splitting, and rendering optimizations, improving user experience and reducing unnecessary re-renders.
- Wrote unit and integration tests using React Testing Library and Cypress to improve application quality and reduce production regressions.
- Participated in architecture discussions, code reviews, sprint planning, and Agile ceremonies to maintain engineering quality and delivery consistency.
- Worked closely with designers, product managers, QA engineers, and DevOps teams to deliver production-ready features through CI/CD pipelines.
- Improved technical SEO by resolving issues identified through Google Lighthouse, Google Search Console, and Ahrefs, enhancing Core Web Vitals, crawlability, accessibility, and search visibility.
- Implemented accessibility improvements aligned with WCAG guidelines to create more inclusive user experiences.

Frontend Engineer | eCONNECT | Jun 2022 – Jan 2023

- Developed Woozeeee features with React, Next.js and TypeScript.
- Built reusable UI components and resolved production issues.
- Collaborated with cross-functional teams in Agile delivery

Frontend Engineer | YouVerify | Jan 2021 – Jun 2022

- Built secure identity verification interfaces using Vue.js and Nuxt.js.
- Integrated REST APIs and reusable components.

Frontend Engineer (Intern) | Revent Technologies | 2021

- Developed responsive Angular applications and reusable UI components.
- Converted UI/UX designs into production-ready interfaces.
- Collaborated with senior engineers using Agile Scrum practices.
- Built reusable frontend components while learning enterprise software engineering best practices.

Selected Projects

Institutional Management System: Built a full-stack institutional management platform with Admin, Student and Applicant portals using Next.js, Node.js, PostgreSQL and Prisma.

Competitive Monitoring Platform: Designed a Python-based competitive intelligence platform that monitors competitor websites, detects feature releases using BeautifulSoup, and delivers AI-generated summaries through Slack and email using Grok AI.

Nigerian Election Sentiment Analysis: Developed an NLP solution using Pandas, NLTK, VADER and BERTopic to analyze election discussions from Twitter data.

Education

- B.Sc. Computer Science - Southwestern University, Nigeria (2026)
- Higher National Diploma (HND) Computer Science, Federal Polytechnic Offa, Nigeria (2019)
- Ordinary National Diploma (ND) Computer Science, Kwara State Polytechnic, Nigeria (2016)
